

METLAM AUSTRALIA POWDER COATED STAINLESS STEEL PRODUCT CLEANING AND MAINTENANCE GUIDE

For best results on Metlam Australia powder coated stainless steel products, we recommend cleaning with fresh water, mild detergent and a clean cloth. After cleaning, wipe the surface dry with a soft absorbent cloth.

Please note powder coating is not impervious to harsh solvents and many commercial cleaning solutions will damage the finish. High pressure cleaning is not recommended as this may also compromise the quality of the product.

AVOID SCRATCHES

Powder Coated stainless steel can be scratched by careless handling or aggressive scrubbing. Avoid dragging rough items across the surface and be aware that grit, trapped under other materials, can actually cause surface scratches.

CHEMICAL REACTION

If left in contact with salts or acids for extended periods, Metlam Australia powder coated stainless steel products may be compromised. Applying a regular maintenance/cleaning schedule will minimise any potential problems.

Note: Using incorrect cleaning products can damage your Metlam Australia powder coated stainless steel product and void the [warranty](#).

AVOID:

- * Rubbing with steel wool (wire wool) or scraping with steel tools
- * Using scourers and cleaning cloths that have been used on ordinary steel
- * Rubbing plastic scourers across the grain of brushed surfaces
- * Using concentrated bleach or hydrochloric acid-based cleaning products
- * Contact with products containing chlorine bleach, hydrochloric or muriatic acid
