CARBINE

When convenience meets security, the Carbine CEL2 range is the ideal locking solution for your home, granny flat, investment property or small business office.

For fire rating details refer to www.carbine.com.au/fire-rated

Fire Rated   IP54 RATED   Bluetooth   NCC Compliant

Never worry about a lost key again as CEL2 has several keyless access options including RFID accessories, 4 to 8 digit codes, NFC^, the Carbine Connect App and more.

CEL2 comes in a standard and a Bluetooth model, both with a leverset or deadbolt option. There is also a 2 hour fire rated variant available for each leverset model making CEL2 a great selection for use on emergency exits or fire doors.

All CEL2 leverset models have been designed to IP54 standards and are NCC compliant.

^We recommend checking your smartphone before purchasing or installing. If your phone is not compatible we suggest using the RFID sticker on the back of your phone.

HOME

OFFICE

INVESTMENT PROPERTY

SHORT STAY RENTAL

There are three CEL2 models — a leverset, deadbolt and fire rated leverset. Each option allows for an easy and convenient access to your home, investment property or office with several modes of access by way of a four to eight digit code, NFC enabled smart phone or via a RFID FOB, card, sticker or wristband.

* We recommend checking your smartphone before purchasing or installing. If your phone is not compatible we suggest using the RFID sticker on the back of your phone.

The Carbine CEL2 leverset or deadbolt models offer your family and tenants effortless access without the worry of losing a key.

FEATURES

+ Low profile touchscreen

+ Fits in a standard 54mm lockset hole with no additional drilling required

+ Suits door thicknesses from 35-51mm thick doors

+ 60-70mm adjustable backset

+ C4 Keyway - 6 pin PD style cylinder & keyed to a 5 pin key

+ IP54 Rated

+ NCC Compliant Lever

+ Fire Rated for up to 2 hours (Leverset model variant)

+ 0-9 digital touch pad allows for 100 unique user pin codes or user RFID cards

+ Seven entry options including; 4-8 digit code, RFID Card / Sticker / Wristband / Key FOB, Key override, and NFC enabled smartphone*

+ Auto-lock or auto-lock delay timer (auto-lock off by default. Time range 5-99 seconds) (Deadbolt models 10-99 seconds)

+ Single-use user code which can only be used once to unlock the lockset

+ Guiding code. A set of random codes to be entered prior to any user code to prevent code probing

+ Volume control to turn on/off door lock operation volume

+ Requires 4 x AA batteries (not included). We recommend Duracell® batteries for optimal performance

+ Available in satin nickel or matte black

CEL2
BLUETOOTH

LEVERSET
DEADBOLT

Fire Rated | IP54 RATED | Bluetooth | NCC Compliant

All CEL2 Bluetooth lever set models have the same look and feel as the standard CEL2 such as the NCC compliant lever, IP54 rating, and satin nickel or matte black finishes, but offer the exclusive app-controlled Bluetooth features

Please note: Only one Bluetooth connection can be established at a time; simultaneous connections are not supported.

The CEL2 Bluetooth model comes in both a leverset and deadbolt version, as well as a fire rated leverset option. Not only does it allow for up to 200 user codes or RFID connections* but it also has the added convenience of being able to control the lock via the Carbine Connect mobile app.

User codes or RFID connections has a total capacity of 100 sets combined on the CEL2 Bluetooth leverset model and 200 user codes on the CEL2 Bluetooth deadbolt model.

The Carbine Connect app is a user friendly interface that can easily be downloaded from the Apple or Google Play stores. Connecting via Bluetooth, Carbine Connect allows you to add users, lock and unlock, change lock modes and even produce a code for access for a specified amount of time which is perfect for allowing access to short term accommodations or for contractors.

EFFORTLESS ACCESS

With the Carbine Connect mobile app you can control the following and more on all CEL2 Bluetooth models:

- Setup multiple locks
- Add and delete users via QR code, keypad code or RFID
- Send a code to a guest
- Lock and unlock
- Set vacation mode
- Turn on double authorisation mode
- Turn on passage mode
- Control Lock volume
- Auto unlock feature (optional) - automatically open your lock without opening the app, within 10 meters of Bluetooth transmission distance
- Event log - shows history of access events for the lock

Bluetooth™

Users can be set up with 3 access types:

- Permanent (unless deleted by admin)
- Time period access - for a limited time period
- Scheduled access - only for certain times of day

Add a lock as invited manager/user

You can share access to other users. When they receive the invitation, they simply click the link in the invitation to install the App and access the shared lock.

In the "Add User" function, you can set up different user roles for different management rights. After adding a user successfully, a QR Code will be generated.

Add a lock as invited manager/user

Use the QR code received to unlock. Notice that the lock can only connect to one user at a time.

Lock/Unlock via the APP

Tap the icon at the middle of main page to lock/unlock. Green icon indicates unlocked status; Red icon indicates locked status.

Auto Unlock

Auto-Unlock recognises you as you're arriving and unlocks the door as you approach the lock. When your hands are full, Auto-Unlock is the perfect feature to opening your door.

Settings

Managers can change settings from here.
